

Psychology of Vision

The Rise of the Feminine
- balancing our life

May 19, 20 & 21, 2017

with **Francine Girard** (PoV Level 3 Trainer)

As consciousness rises, the Feminine - compassion, love, bonding - becomes more prevalent. With this increase in awareness and experience, gratitude and joy become more common. PoV has promised to balance the Masculine and Feminine. Not by diminishing the True Masculine, but simply by valuing the True Feminine.

What is the Feminine. It is the courage of the heart, the power of joining, the valuing of relationships, the nurturing of Truth. The Rise of the Feminine brings balance to our lives and allows us to know and feel the direction, the Truth, of our next step. Knowing who we are, and who it is we promised to be brings relief
Come, let's undo the defenses.....

Francine Girard is a Level 3 PoV Trainer. With more than 20 years experience with PoV, Francine is the Director of PoV's International Training Program. She has guided the program structure with policies and procedures, tapping into her engineering background, and continues to evolve the program in partnership with the global Trainer community. "I help to empower others, with tools they need to deal with everything in life. PoV embodies the essence of who we are as humans" she says. "I aim to help others save time, money and pain while healing. Psychology of Vision does that."
