(will need to be paid before your child can start)**

Please contact the school to register your child: 250-679-8837

What is Chief Atahm School Language Nest?

The Program provides Secwepemc language teaching for young children from birth to 5 years of age. The goal is to develop understanding and speaking ability in order to maintain Secwepemc identity.

Why teach the language early?

Research shows that the human brain is better able to acquire languages before the age of 6 and that young children are generally better second-language learners because they are willing to take risks in their learning. Also learning a second language actually increases intelligence! Each language learned opens up a new part of the brain.
