

## *Adams Lake Membership*

The SCIS Photo App is a digital application created by the Government of Canada that allows applicants to take a photo with a smartphone and submit it online as part of their Secure Certificate of Indian Status (SCIS) application

This app will be available with me when applying for a Secure Certificate of Indian Status (SCIS) and submit it straight from our smartphone free of charge.

The SCIS Photo App eliminates the cost of photos and offers a convenient way to provide the photo required to apply for the secure status card.

To complete your SCIS application, you must submit a complete application form, a Guarantor Declaration Form and supporting documentation. To find out how to apply, visit [canada.ca/indian-status](https://canada.ca/indian-status).

Once your complete application and supporting documentation has been received, your photo will be linked with your application. You do not need to contact Indigenous Services Canada (ISC) to inform them that you have submitted your photo through the App.

All information provided through the SCIS Photo App is encrypted. The collection and use of personal information is in accordance with the [Privacy Act](#).

[You must be registered as a Status Indian under the Indian Act to get a status card](#). If you are not registered, you must apply for registration and have your registration number available before using the SCIS Photo App.

The SCIS Photo App cannot be used to submit your photo to apply for the laminated Certificate of Indian Status (CIS).

The SCIS Photo App may not work on devices other than smartphones, such as iPads and tablets. The use of the SCIS Photo App on iPads and tablets will be optimized in the future.

If you would like to book a appointment with me to apply for the NEW SCIS card you may do so by calling (250) 679-8841 Ext. 2247.

Thanks,

*Kristina Deleeuw*
